

Re-Life fabrics

Solar control fabrics made with recycled PET bottles

Re-Life fabrics

Luxaflex® blinds not only enhance the beauty of your home but also contribute to a better climate.

Our **RE-LIFE** fabrics are crafted using recycled PET bottles, showcasing our commitment to the future of our planet.

These fabrics, made from recycled polyester derived from PET bottles, come in a stunning array of colours and are available for:

- roller blinds
- plissé shades

RE **LIFE**

From PET bottles to fabric

1 COLLECTION

We meticulously collect used PET bottles, replacing virgin yarns with recycled plastic.

RE **LIFE** proudly carries the OEKO-TEX® Standard 100 certification and complies with the forthcoming European Green Claims Directive Law for accurate sustainability claims.

2 SHRED PLASTIC WASTE

In this stage, plastic waste from collected PET bottles is meticulously shredded, minimizing CO₂ emissions and water usage in our manufacturing process. Using recycled plastics simplifies manufacturing, contributing to a substantial decrease in our environmental footprint.

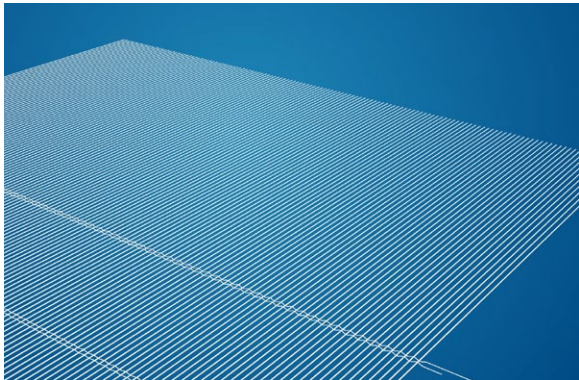

Less energy is needed. Less CO₂ is emitted. Less water is used.

3 SPIN INTO YARN

Recycled plastics undergo an innovative process, being spun into high-quality yarn. This showcases our dedication to eco-conscious practices and contributes to reducing water usage and CO₂ emissions at our production sites.

4 WEAVE INTO FABRIC

The spun yarn is skillfully woven into **RE: LIFE** fabrics, ensuring a beautifully designed, sturdy and durable product. Every step, from yarn selection to quality checks, reflects our commitment to delivering an environmentally friendly product.

Making a difference

Sustainability is a top priority globally, demanding a collective effort to use natural resources efficiently. Luxaflex® products inherently contribute to sustainability by controlling light and heat, reducing energy loss and cutting heating and cooling costs. Our philosophy is straightforward: great products begin with great design. Our focus on using recycled materials and improving manufacturing processes reflects our

commitment to sustainable homes and a better world. Luxaflex® fabrics offer beauty, functionality, durability and sustainability.

With each new collection, Luxaflex® takes a significant step towards a more sustainable product offering. New qualities are crafted from innovative recycled materials and our best-selling products are transitioning to materials with recycled content.

RE³LIFE

The OEKO-TEX® Standard 100 means that no harmful chemicals have been used in the production process. Many fabrics in the Luxaflex® collections have been certified by the rigorous OEKO-TEX® standard to ensure a healthy and safe home.
