Child Safety

Luxaflex® LiteRise® Venetian Blinds - size limitations apply

16/25mm standard is now cord/wand and cord/cord for 35/50/70mm

As this product is safe by design, it is exempt from the child safety requirements specified in EN 13120:2009+A1:2014, namely:

- LiteRise® Can be fitted less than 1500mm from the floor
- LiteRise® requires no raise/lower cords, therefore cord cleats aren't required

Cord operated blinds

Blinds using cord operation to raise/lower, or tilt the blind will be compliant with EN 13120:2009+A1:2014 as follows:

Safety devices

Raise/lower cords will be connected by a breakaway cord connector. Blinds using this method of operation (pull cords) must be fitted at least 1.5m from the floor.

Safety Cleats

All cord operated blinds shall be supplied with cord cleats to wrap loose cords out of reach at all times. All cleats require to be fitted at the point of installation and at least 1.5m above the floor to ensure compliance with the child safety requirements of EN 13120.

Endless chain/cord (mono) operated blinds will be supplied with a 'P' clip or similar tensioning device to keep chain/cord loops under constant tension.

This device must be fitted at the point of installation to ensure compliance with the child safety requirements of EN13120.

Control lengths

As a requirement of the new standard, the maximum control length is determined by the safety device used on the product as well as the drop of the blind or installation height. The chart below details the maximum length available for raise/lower cords, tilt cords and chain/cord loops.

Maximum control lengths

Safety device used	Installation Height	Max control length
Breakaway cord connector or tensioning device	Not known and drop of blind up to 2.5m	Up to 1m
	Not known and drop of blind over 2.5m	Blind drop less 1.5m
	Known	Distance from floor to end of control to be at least 1.5m

HOW TO CALCULATE A PRICE

- Based on your specific width and height, the prices detailed on pages 15 and 16 indicate the price for a standard product. On this page the standard product is defined.
- If applicable, options or alternative controls can be added. After calculating the price for a standard product, the add-on price for an option and the add-on price for the type of control can be added. The total product price is the combination of the price tables, options and alternative control.

HOW TO ORDER

Luxaflex® Connect

- Instant ordering, 24/7-even when the Luxaflex® office is closed
- Final order input onto our system-no queries
- Full insight into your order history
- Luxaflex® Connect will confirm if the blind is possible to manufacture
- Instant pricing including all product surcharges, with discounts show as a value and not a percentage.
- Available on mobile devices
- Full online programme which means no installation of software is required.

Product description

System Types

Venetian blinds are available in 5 slat widths (16, 25, 35, 50 and 70 mm). Different product types, operation options and design options are available:

- 16 and 25 mm blinds come as standard with modern, colour matched steel head- bottom rails with plastic, colour-coordinated endcaps.
- 16 and 25 mm Top Down Bottom Up blinds with tilt slider come with sleek aluminium design top and bottom rails, available in white, silver and black with matching plastics.
- 35, 50 and 70 mm blinds have colour-coordinated steel head and bottom rails, with transparent integrated endcaps .
- 50 and 70 mm Design XL blinds have uniquely designed head and bottom rails in aluminium, available in white, silver and black with matching plastics. Invisible brackets and a colour coordinated slat finish a sleek and unique design.

Child Safety - Designed with safety in mind

Luxaflex® considers child safety a top priority. Making child safe products for homes is an integral part of our design philosophy. From cordless alternatives to fully motorised systems, Luxaflex® offers many innovative lifting systems designed with safety, comfort and beauty in mind.

Standard Venetian Blinds

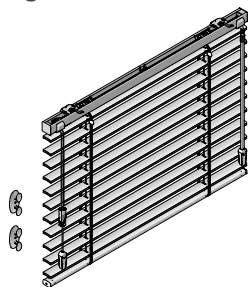

- 16 and 25 mm venetian blinds are made as a standard with sleek modern steel rails and colour coordinated end caps.
- 38mm venetian blinds have steel rails and integrated non-parallel plastic end caps.

- As a standard 50 and 70 mm venetian blinds are also made with steel rails and integrated translucent end caps. As an option Design XL can be chosen, where the blind will be made with steel/sl aluminium extruded rails in one of three colours: white, black or anodized metal. Both head and bottom rail will be finished with a matching colour seal.
- Standard operation is cord / wand (16 / 25 mm) or cord / cord (38 / 50 / 70 mm).

MegaView®

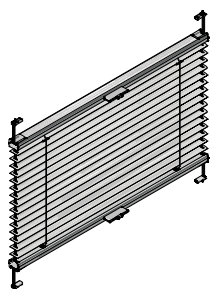

- Megaview is available in 25 mm and 50mm slat width.
- Standard operations are cord / wand for 25 mm slats and cord / cord for 50 mm slats.

- Optional operations for 25 mm MegaView® are endless chain, crank, handle/tilt wand or motorised operation.
- Optional operation for 50 mm MegaView® is cord/wand.

Note!: When installing 25 mm monocommand MegaView® blinds next to each other always select the control on the same side to avoid the difference in tilting of the slats.

Top Down/Bottom Up

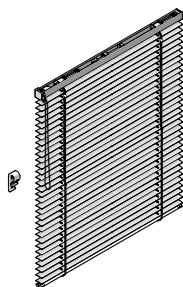

Tensioned Venetian Blind, ideal for tilt and turn windows and doors.

- Raise and lower by operating the metal handle on the top- or bottom profile. Tilting is operated by a slide button on the handle.
- Always mounted with tension cord.

- Tilt slider on top- and bottom profile as standard. Optionally tilt slider can be supplied on the top profile only.
- Top- and bottom profile available in white (ref: 0155), silver grey (ref: 0952) and black (ref:1858) Specify profile colour when ordering.
- Foot plates at top and bottom as standard (recess mounting), available in white, grey & black.
- On face mounting optional, specify in-recess or on-face mounting when ordering.
- Optional: tilt and turn window clamp support.
- Optional: FrameFix™

VarioFlex

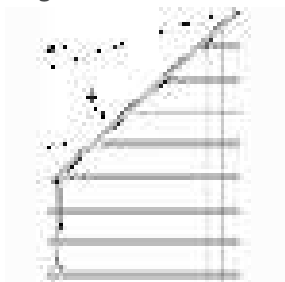

Two sections in one blind with separately controllable tilt- positions.

- Standard operation: endless chain; white, grey, anthracite or black plastic.
- Optional control: crank or motorised.
- Transition zones are visible when blinds are open and closed.
- Specify the separation height in mm from top when ordering.
- Minimum separation height is 200 mm.
- Lower segment must not be less than 1/3 of the product height.

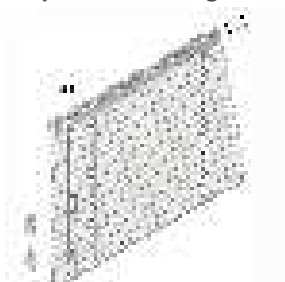

Angled head rail/bottom rail

- Available for 25 mm venetian blinds.
- Only possible with cord / wand operation.

- Operation is always on the short side.
- Head or bottom rail can be placed at an angle between 10 and 45 degrees.
- Not possible with side guiding.
- Length of smallest slat at least 85 mm; please note the gap.
- Always include a drawing with the order.

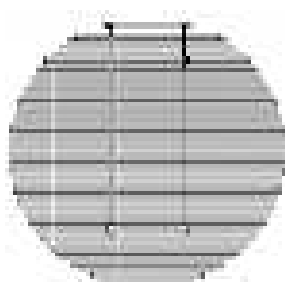

Sloped Blinds (angled sides)

- Available with 25, 35 and 50 mm slats
- Standard operation is Cord - Wand

- Cord and wand control always on the straight side
- X = The maximum difference between the length of the head rail and bottom rail:
- 25 mm blind: max. 200 mm
- 35 mm blind: max. 300 mm
- 50 mm blind: max. 400 mm
- Type A cannot be raised when mounted in-recess
- Always include a drawing with the order

Round Blinds

- Available for 25 mm venetian blinds with cord / wand operation
- Partially raisable when mounted in-recess.

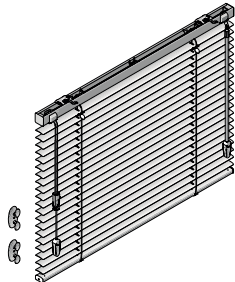

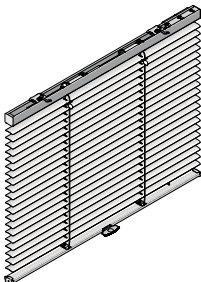

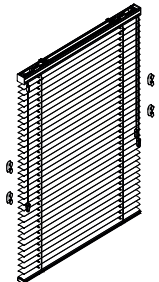

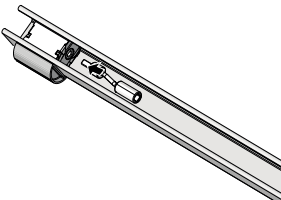

- Always mounted with swivel brackets.
- Width of head rail/bottom rail approximately 1/3 of the diameter.
- Not possible with side guiding.
- Always state the recess size and diameter of the blind and include a drawing with the order.

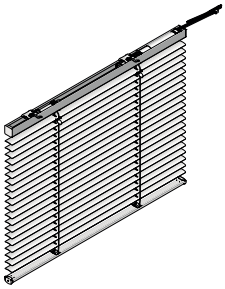

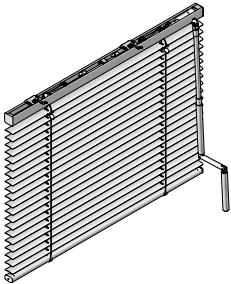

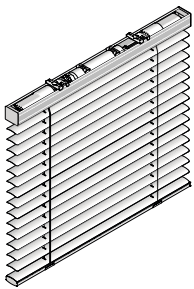

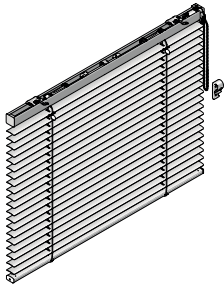

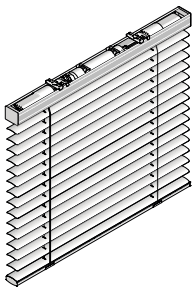

OPERATION TYPES

All products are produced according to the child safety requirements as written in EN 13120.
(Internal blinds - Performance Requirements Including Safety).

Operation types

	Cord - Wand · Standard operation for 16 & 25 mm slats · Optional operation for 35, 50 & 70 mm slats · Controls can be on one side or split · Also available in combination with Design XL		LiteRise® · Available with 25 & 50 mm slats · Optional available with cable side guiding (tip: order +50 mm length for on face mounting) - For 25 mm slats: · Always with a design handle in the colour white or aluminium · Above 1100 mm width, two handles are required · For on face mounting, always use the supplied spacer blocks · When mounted in recess or with side guiding, it will be possible that a lightgap remains at the bottom side when closed · Due to the closing method, the blinds are 60 mm longer than specified. This means three extra slats on the bottom rail in closed position · Not possible in combination with tilt-and-turn brackets - For 50 mm slats: · LiteRise® is provided without handle: raising and lowering of the blind is operated by moving the bottom rail · Tilting is operated by tilting wand · Available with string- and fabric tapes
	Cord - Cord · Standard operation for 35, 50 & 70 mm slats · Controls can be on one side or split · Also available in combination with Design XL		Handle - Wand · Available with 16 & 25 mm slats · Always with cord guiding · Plastic handle is standard, metal design handle is optional · Operation rod optional (not possible with design handle) · Both in recess or on face mounting possible · Also available with FrameFix®

	Motorised 24V · Available with 16, 25 mm slats · Standard supplied with M25S motor, with soft start, tilt function and electronic top- and bottom end stops. Optional with Somfy Encoder motor · Not available with fabric tapes · Optional available with cable side guiding		Crank · Available with 16, 25, 35, 50 & 70 mm slats · 16, 25 & 35 mm slats are only available with string tape. 50 & 70 mm slats are available with string tape and fabric tape · Fixed or removable aluminium rod with all blinds · During raising and lowering of the blind, the slats will be in closed position · Optional available with cable side guiding · For 50 and 70 mm slats and standard head rail cord spools protrude above the head rail, leaving a 10 mm lightgap at the top in case of ceiling installation
	Motorised 230V · Available with 35, 50 & 70 mm slats. 35 mm is always with a 50 mm head rail · Standard supplied with Geiger motor. Optional with Somfy RTS or IO motor · Motor connection can be on the left, the right side or in the middle. Depending on the width of the blind, the motor will be placed as close as possible to the selected position · Available with string- and fabric tapes (50 and 70 mm) · Optional available with cable side guiding		Endless chain · Available with 16, 25, 35, 50 & 70 mm slats · 35 mm only possible with 50 mm head rail · 16, 25 & 35 mm slats are only available with string tape. 50 & 70 mm slats are available with string tape and fabric tape · 16 mm and 25 mm blinds are provided with a Child Safety release mechanism. This system is always combined with a plastic chain. Available in 4 colours: white, grey, anthracite or black · For 35, 50 and 70 mm slats the chain is standard made of metal. Optional plastic chain is possible in 4 colours: white, grey, anthracite or black · The control mechanism of 50 & 70 mm blinds protrudes outside the head rail. The spacer blocks that are supplied with the standard head rail are needed both for in recess and on face mounting · During raising and lowering of the blind, the slats will be in closed position · Note! 35, 50 & 70 mm slats have bottom exit as an option, in that case the head rail will be 12 mm wider than the ordered width on the operation side
	PowerView® · Available with 16, 25, 35, 50 & 70 mm slats · 16 and 25 mm are provided with an 18V motor · 35, 50 and 70 mm are provided with 50 mm head rail (standard or design XL) and a 230V motor · Not available with fabric tapes · PowerView® blinds are always free hanging models. Optional available with cable side guiding. PowerView® Metal VB products with an AC motor: The tilt action on these products is pulsed unlike the continuous motion offered in the lower voltage versions.		

Endless cord

- Available with 25 & 35 mm slats, in combination with a 35 mm head rail
- Not available with fabric tapes
- Operation only possible with side exit (next to the slats)
- **Note!** at the operation side the head rail will be 21.5 mm wider than ordered
- Not possible with Design XL head rail
- Optional available with cable side guiding

Handle - Tilt slider

- Hardware available in 3 colours: white (ref: 0155), silver grey (ref: 0952) and black (ref:1858). Enter the desired colour when ordering
- Tilt slider always in the handle on both top and bottom rail, optionally available on top rail only
- Standard supplied with foot plates for in recess mounting / mounting on the glass beading
- Optional with on face brackets. Enter the mounting method (on face / in recess) upon ordering
- Mounting on the glass is optional (TruFit®)
- Mounting with magnetic frame (FrameFix®) is optional
- Optional: tilt- and turn brackets

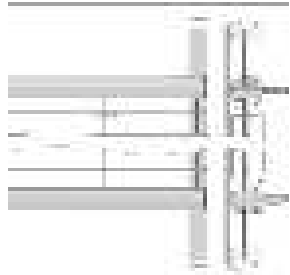

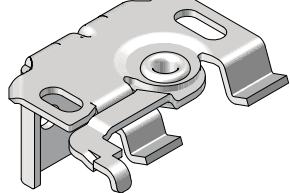

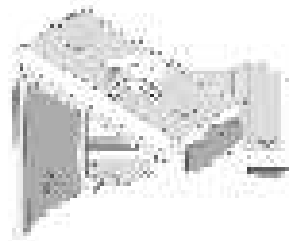

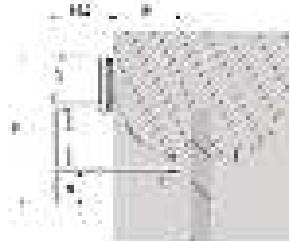

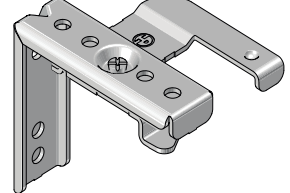

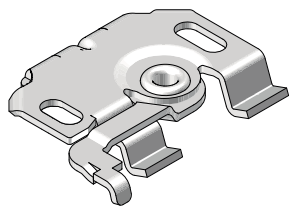

Specific attention points

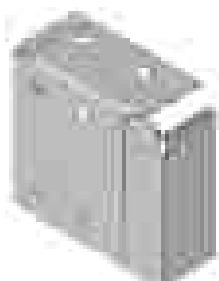

- Luxaflex® products are designed with safety in mind. The Venetian Blinds are supplied as standard with the necessary safety components that have to be attached to the window frame or the wall. The assembled cords are fitted with a cord connector, which will open as soon as more than 6 kg of weight is applied in between the cords.
- 50 mm & 70 mm mono command products, such as crank, motorised, endless chain, are available with string tape and fabric tape.
- PowerView® is only available in combination with string tape.
- PowerView® 50 mm always has the motor and cable exit on the left side of the blind.
- 16, 25 & 35 mm mono command products, such as crank, motorised, endless cord/chain, are available with string tape only.
- With mono command systems in 50 mm & 70 mm blinds with a standard head rail, a 10 mm gap is created between the ceiling and the head rail when mounted in-recess, because the tape reels and/or motor protrude above the head rail.
- Please note: With the Design XL version, the gap between the ceiling and head rail is approximately 4 mm.

INSTALLATION OPTIONS

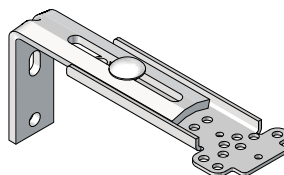

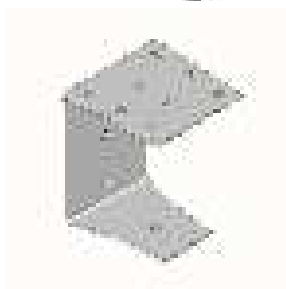

Installation options

	TruFit® · Suitable for Tilt & Turn windows with a max. angle of 15 degrees · Mounting option for Top Down Bottom Up · No screwing in the window frame required · The blind is mounted on the window pane with adhesive profiles · Adhesive profile available in 5 colours: white, grey dark grey metallic, black and magnolia. Head/bottom rails only available in – white 0155 / Grey 0952 / Black 1858		Standard swivel bracket · 3 Different versions, for 16 / 25 mm, 35 mm and 50 / 70 mm venetian blinds · Standard bracket for wall and ceiling mounting of all cord-cord, cord-wand, handle operated and mono command (chain, crank, motor) blinds · For LiteRise® a spacer block is required and included in case of on face mounting. · For in-recess mounting of mono commando blinds, 2 spacers are supplied per bracket to fill up the gap between the head rail and the ceiling for 35, 50 and 70 mm with standard 50 mm head rail · Available in one colour: bright metal
	FrameFix™ · Venetian Blind pre-assembled in magnetic frame · Possible with 16 and 25 mm slat width · Available as standard handle operated and Top Down / Bottom Up model · Suitable for Tilt & Turn windows with a max. angle of 15 degrees · Frames are available in 6 colours: white, cream, anthracite and light grey, dark grey metallic & black · Specified dimensions are the maximum remaining dimension of the profile · Construction height is 14,5 mm · Minimum installation depth is 16 mm · Profile width including flange is 36 mm · Easy to remove · Always use measurement aid. See chapter "Measuring"		Standard swivel bracket · For in-recess mounting of mono commando blinds, 2 spacers are supplied per bracket to fill up the gap between the head rail and the ceiling for 35, 50 and 70 mm with standard 50 mm head rail · Available in one colour: bright metal
	Design XL bracket 50/70 mm · Suitable for 35 mm, 50 mm and 70 mm slat width · Universal bracket for wall- and ceiling mounting of the Design XL system · Suitable for all Design XL operation types · Available in 3 colours: white, aluminium, black. Matching with the Design XL rail		Swivel bracket ceiling 16/25 mm · Available for 16 mm and 25 mm slat width · Optional swivel bracket without back side · Esthetic solution for ceiling mounting · Suitable for the same operation types as the standard 16 / 25 mm swivel bracket · Available in one colour: bright metal
	Design XL bracket 50/70 mm · Suitable for 35 mm, 50 mm and 70 mm slat width · Universal bracket for wall- and ceiling mounting of the Design XL system · Suitable for all Design XL operation types · Available in 3 colours: white, aluminium, black. Matching with the Design XL rail		Installation bracket 16/25 mm · Available for 16 mm and 25 mm slat width · Suitable for the same operation types as the standard 16 / 25 mm swivel bracket · Available in one colour: bright metal

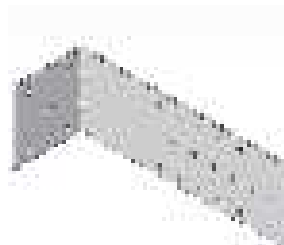

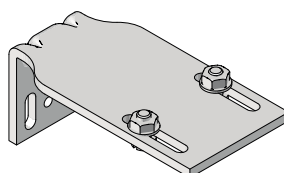

Installation and intermediate bracket 50 mm

- Available for 35, 50 and 70 mm slat width
- Not possible with endless chain
- Suitable for both on-face and in recess mounting. Also suitable for side mounting
- Depending on width, intermediate support in galvanized steel will be supplied
- Available in seven colours: white, black, magnolia, beige, fawn, brown and metallic grey. Default the colour is matched to the head rail

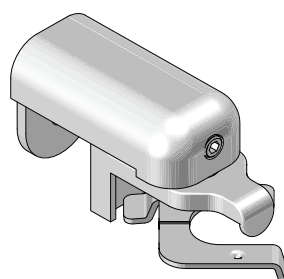

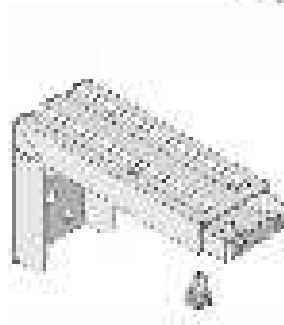

Extension brackets 16/25 mm

- 4 different types:
- 2-4 cm: 156679
- 4-6 cm: 156678
- 9,6-11,4 cm: 156034
- 3-5 cm: 150210
- Available in one colour: metal (156034 is also available in white)

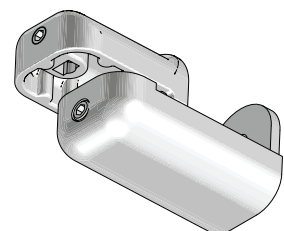

Extension brackets 50 mm

- Depending on the selected bracket, several options are available:
- Swivel bracket:
- 20-70 mm - 160385
- max. 50 mm - 160430
- max. 83 mm - 160424
- Installation brackets:
- max. 47 mm - 160379
- max. 78 mm - 160363
- max. 165 mm - 160379 + 160363
- Available in one colour: metal

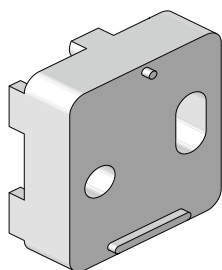

Tilt and Turn window clamp support top side

- Top side for 16 & 25 mm slats
- Swivel bracket incorporated
- Available in one colour: white

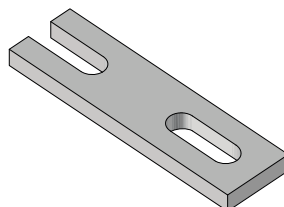

Tilt and Turn window clamp support bottom side

- Bottom side for 16 & 25 mm slats
- For fixing an optional side guiding cable
- Available in one colour: white

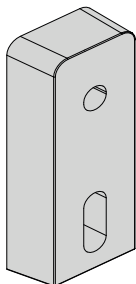

On-face mounting wall spacer block

- Possible with 16 and 25 mm slat width
- Stackable spacer block
- Supplied with LiteRise® as a standard
- Available in one colour: white

Ceiling shim for swivel bracket

- Possible with 50 mm and 70 mm slat width
- Special spacer shim for monocommando blinds
- Available in one colour: metallic

On-face mounting wall spacer block

- Possible with 50 and 70 mm slat width
- 10 mm high spacer block
- Supplied with 70 mm as a standard for on face mounting
- Available in one colour: Clear transparent

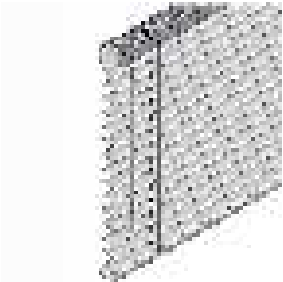

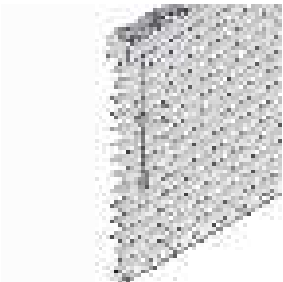

Bracket spacing

	Max. distance between brackets (mm)

Distances apply to standard operating systems. Other operating systems may differ.

If several blinds are hanging directly next to each other, it cannot be guaranteed that the slats will be exactly aligned. This is due to the fact that there is always some stretch in the ladder cords and/or due to different weight ratios with different sizes.

Measuring TruFit®

When measuring the window for ordering TruFit® blinds, the correct deductions must be taken off the sizes by the customer, depending on the size and shape of the window seal. See images below, there are two options, one for window seals < 5 mm (A) and one for window seals > 5 mm (B)

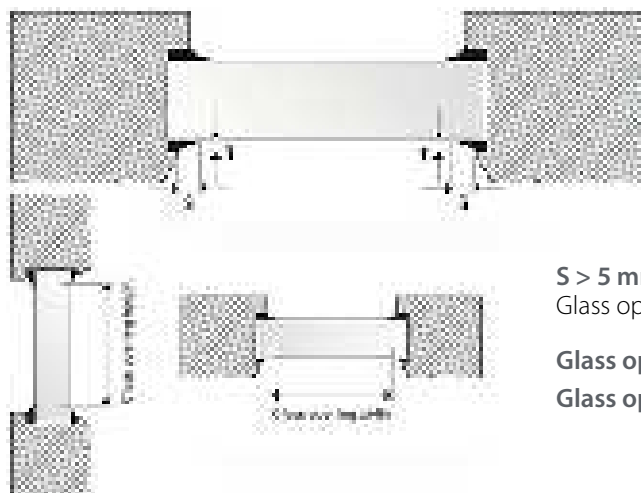

$S \leq 5 \text{ mm}$, measure the **Frame opening width** and **Frame opening height**

$S > 5 \text{ mm}$, follow method B

Frame opening width - 5 mm = Product width "W"

Frame opening height - 4 mm = Product height "H"

$S > 5 \text{ mm AND } T \leq 5 \text{ mm}$, measure the **Glass opening width** and **Glass opening height**

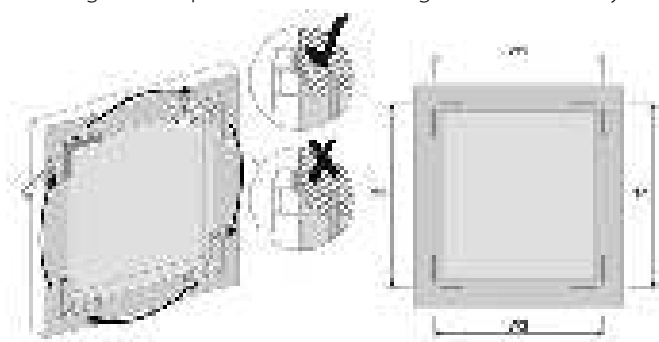

Glass opening width + 3 mm = Product width "W"

Glass opening height + 6 mm = Product height "H"

Measuring FrameFix™

Measuring aids are available and required for measuring a FrameFix™. A FrameFix™ can only be specified as a fixed measure. The dimensions to be specified are measured from the outside of the frame to the outside of the frame. The frame will then be produced with a deduction of 2 mm on width and height.

The magnetic strip must be able to be glued in its entirety on a flat part of the frame.
