Child Safety

All of our products meet with the child safety requirements of EN 13120:2009+A1:2014, Internal blinds - performance requirements including safety.

Pull cord operation:

Pull cords shall be connected by a breakaway connector. Blinds using this method of operation (pull cords) must be fitted at least 1.5m from the floor.

Chain operation:

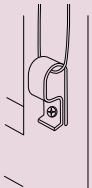

Side chain operated Luxaflex® Duette® Shades will be supplied with a safety chain break. This pre-fitted connector is designed to safely split the chain apart should a child become entangled in the loop.

Control lengths

As a requirement of the standard, the maximum control length is determined by the safety device used on the product as well as the drop of the blinds or installation height. The chart below details the maximum length of looped chain available.

Maximum control lengths

Safety device used	Installation Height	Max control length
Safety Chain Break	Not known	2/3 of the blind drop
	Known	Distance from floor to the end of the control to be at least 0.6m
Breakaway cord connector or tensioning device	Not known and drop of blind up to 2.5m	Up to 1m
	Not known and drop of blind over 2.5m	Blind drop less 1.5m
	Known	Distance from floor to end of control to be at least 1.5m

Safety cleats: all cord operated blinds* shall be supplied with cord cleats to wrap loose cords out of reach at all times. All cleats require to be fitted at the point of installation and at least 1.5m above the floor to ensure compliance with the child safety requirements of EN13120:2009+A1:2014

* with the exception of SmartCord® blinds

FOR FURTHER COPIES OF THIS AND ALL OTHER LUXAFLEX® PRICELISTS GO TO THE DEALER PORTAL <http://dealers.luxaflex.co.uk>
You can download order forms for all products at <http://dealers.luxaflex.co.uk>

Luxaflex® Connect - Easy Ordering

Luxaflex® digital ordering system "Connect": www.luxaflexconnect.co.uk is an online platform which allows you to order your Luxaflex® products 24/7, giving instant access to product specification availability.

Luxaflex® Connect benefits:

- Instant ordering, 24/7 - even when the Luxaflex® office is closed
- Final order input onto our system - no queries
- Full insight into your order history
- Luxaflex® Connect will confirm if the blind is possible to manufacture
- Instant pricing including all product surcharges, with discounts show as a value and not a percentage.
- Available on mobile devices
- Full online programme which means no installation of software is required.

Luxaflex® Dealer Portal

The Luxaflex® Dealer Portal is an extensive dealer support tool containing vast amounts of product information as well as:

- Downloadable PDF pricelists, fitting instructions, order forms,
- Child Safety information, up to date lead times, Luxaflex®
- Training Academy dates and much more.
- Easy to use and navigate, helping you find the information you need quickly.

Plissé Shades 20mm and 32mm - Retail Prices Including VAT

Headrail Information

SBS (Common Head Rail) This head rail is used for SmartCord®, LiteRise® and PowerView® controls only EOS

EOS (Effective Optimised System) This head rail is used for Cord Lock, Handle and roof model options

EOS XL This head rail is used for Endless Chain, PowerView® and 24v motorised control only

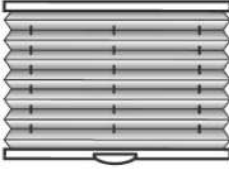

Please note all head rails are available in all colour ways. EOS headrails can accommodate Side Channel options

SBS and EOS headrail dimensions can be found on page 23

Pleat alignment. Due to minor variations present during the fabric pleating process, regrettably we cannot guarantee that the pleats on blinds fitted adjacent to each other will align.

Freehanging Models (1)

The below models are for freehanging variations only. Tensioned/guided variations for these models can be found on pages 7,8 and 9

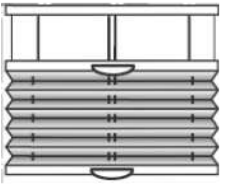

- Free hanging model
- Stacks at the top
- Priced as per the standard price tables - pages 10 & 11 for Smartcord, LiteRise and PowerView EOS or pages 12 & 13 for pull cord, chain and electric

Measuring FrameFix™

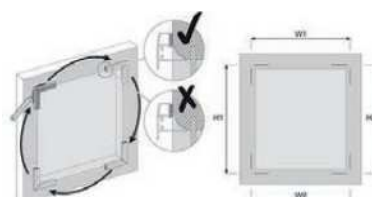

Measuring aids are available and required for measuring a FrameFix™.

A FrameFix™ can only be specified as a fixed measure. The dimensions to be specified are measured from the outside of the frame to the outside of the frame.

The frame will then be produced with a deduction of 2 mm on width and height.

The magnetic strip must be able to be glued in its entirety on a flat part of the frame.

Frame will arrive partially assembled.

Carriage paid for delivery to mainland dealer addresses in England, Scotland and Wales. Surcharge may apply for home and non-mainland deliveries. Delivery to the Channel Islands - £35.50. Delivery to Northern Ireland - £25.

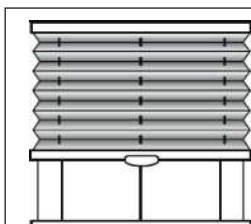

Luxaflex® Plissé Shades
