Pirouette® Shades

Suggested Retail Prices (inc.VAT)
March 2024

Child Safety

All of our products meet with the child safety requirements of the revised publication of EN 13120:2009+A1:2014, Internal blinds – performance requirements including safety.

Control lengths

As a requirement of EN 13120:2009+A1:2014, the maximum control length is determined by the safety device used on the product as well as the drop of the blind or installation height. The chart below details the maximum length of looped control chain available.

- The material and all related rights remain exclusive ownership of (the subsidiary concerned from) Hunter Douglas, unless expressly different agreed.

HOW TO CALCULATE A PRICE

- Based on your specific width and height, the prices detailed on pages 15 and 16 indicate the price for a standard product. On this page the standard product is defined.
- If applicable, options or alternative controls can be added. After calculating the price for a standard product, the add-on price for an option and the add-on price for the type of control can be added. The total product price is the combination of the price tables, options and alternative control.

HOW TO ORDER

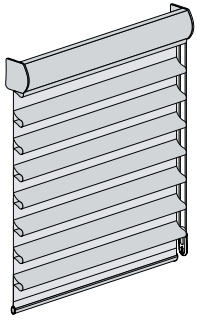

Luxaflex® Connect

- Instant ordering, 24/7-even when the Luxaflex® office is closed
- Final order input onto our system-no queries
- Full insight into your order history
- Luxaflex® Connect will confirm if the blind is possible to manufacture
- Instant pricing including all product surcharges, with discounts show as a value and not a percentage.
- Available on mobile devices
- Full online programme which means no installation of software is required.

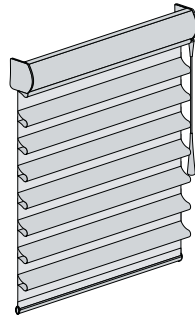

Pirouette® Shades - Retail Prices Including VAT

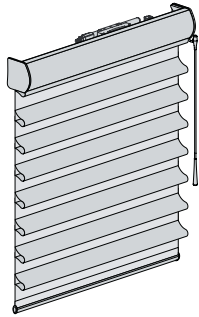

EASYRISE™

Continuous cord loop and clutch system is standard on all Pirouette® shadings.

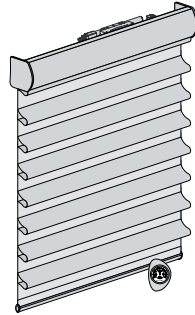

ULTRAGLIDE®

With one click, the fabric panel drops for complete privacy. Pump the wand to open the vanes or raise the shading.

SOFTTOUCH® MOTORISATION

Simple, motorised wand-controlled operation. Gently pull down to close shadings and push up to open them.

POWerview® AUTOMATION

Our state-of-the-art PowerView® battery-powered system offers convenience with the touch of a button, as well as reduces side edge gaps for better light control.

ROOM-DARKENING FABRICS

Ideal for bedrooms, media rooms or anywhere room darkening is desired.

Available in all Pirouette® fabrics, colors and vane sizes.

EasyRise™ specifications

- Fits rectangular windows up to 3040mm x 3650mm
- Bottom fabric panel is adjusted to accommodate the height of the shading. Vane alignment should be within 1/4" from one shading to another for shadings of the same fabric style, color, vane size, opacity and height.
- Shades raise from the bottom up
- Side-by-side vane alignment is standard for shadings of the same fabric style, colour, vane size, opacity, height and mounting style.

Ultraglide® specifications

- Fits rectangular windows up to 3040mm x 3040mm
- Uses the UltraGlide® wand
- With one click the fabric panel drops. Pump the wand to open the vanes or raise the shade.
- Bottom fabric panel is adjusted to accommodate the height of the shading. Vane alignment should be within 6.35mm (1/42)" from one shading to another for shadings of the same fabric style, color, vane size, opacity and height.
- Shades raise from the bottom up
- Side-by-side vane alignment is standard for shadings of the same fabric style, colour, vane size, opacity, height and mounting style.
- Wand length must be specified when ordering, this can be ordered in 152.4mm (6 inch) increments from 304.8mm (12 inches) to 2133.6mm (84 inches). See chart for available sizes

SoftTouch® Motorisation specifications

- Fits rectangular windows up to 3040mm x 3040mm
- Battery system with wand control
- Bottom fabric panel is adjusted to accommodate the height of the shading. Vane alignment should be within 1/4" from one shading to another for shadings of the same fabric style, color, vane size, opacity and height.
- Shades raise from the bottom up
- Side-by-side vane alignment is standard for shadings of the same fabric style, colour, vane size, opacity, height and mounting style.
- Standard wand length supplied (approx 50% of shading height) unless stated on order. None-standard wand lengths can be ordered in 152.4mm (6 inch) increments from 304.8mm (12 inches) to 2133.6mm (84 inches)

PowerView® Automation specifications

- Fits rectangular windows up to 3040mm x 3040mm
- Automated system with wireless control
- Bottom fabric panel is adjusted to accommodate the height of the shading. Vane alignment should be within 1/4" from one shading to another for shadings of the same fabric style, color, vane size, opacity and height.
- Shades raise from the bottom up
- Side-by-side vane alignment is standard for shadings of the same fabric style, colour, vane size, opacity, height and mounting style.
- Right-side motor and programming button only

Pirouette® Shades - Retail Prices Including VAT

Mounting requirements - EasyRise™, Ultraglide®, SoftTouch® Motorisation and PowerView® Automation

Inside recess	
Minimum mounting depth	26mm
Minimum mounting depth if the blind is fully recessed	96mm
Outside recess	
Minimum flat vertical surface	26mm
Recommended width overlap per side	77mm

Finished Product Dimensions - EasyRise™, Ultraglide®, SoftTouch® Motorisation and PowerView® Automation

Inside recess	
Headrail Unit Width	7mm
Shading height	4mm - 7mm
Fabric width (EasyRise® and Ultraglide®)	29mm
Fabric width (SoftTouch® Motorisation & PowerView® Automation)	20mm
Outside recess	
Headrail Unit Width	Ordered width
Shading height (standard)	4mm - 7mm
Shading height (zero bottom fabric panel)	Ordered height + up to 127mm
Fabric width (EasyRise and Ultraglide)	21mm
Fabric width (SoftTouch Motorisation & PowerView Automation)	12mm

Edge Gaps - EasyRise™ and Ultraglide®

Inside recess

Pirouette® Shades - Retail Prices Including VAT

Design and operation

Luxaflex® Pirouette® Shades consist of a semi-opaque or room-darkening front fabric and a sheer rear fabric. When the shade is fully lowered, the front fabric can be opened to form vanes and allow view through the rear sheer fabric.

A bottom fabric panel is adjusted to accommodate the height of the shade. The height of this panel varies with vane size and ordered height. This is a normal, inherent characteristic of the product.

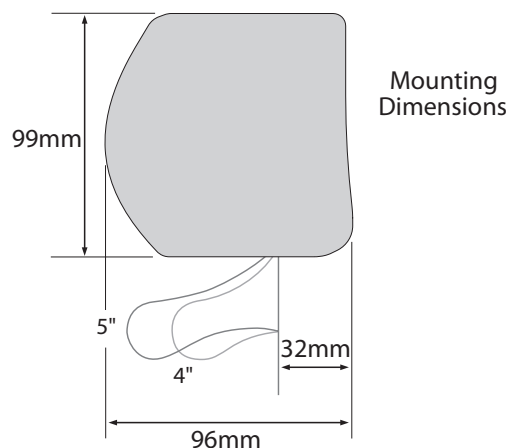

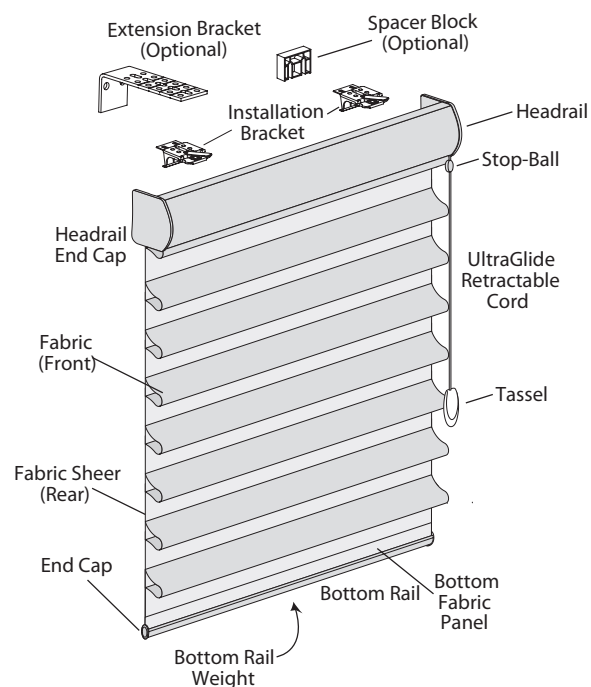

The shade is concealed inside a fabric covered headrail when raised. Pirouette® Shades can be operated using either the UltraGlide® or PowerView® lifting systems.

As with all textiles, Pirouette® fabrics are subject to some variations. Slight wrinkles, puckering or bowing are inherent to textile products and should be considered normal, acceptable Quality and should not be considered as product defects.

If a Pirouette® Shade has been fully lowered with the vanes open for a long period of time, the vanes may become "set" - they may not easily close or flatten. This is a normal characteristic of fabric products.

If this happens, toggle the cord to coax the vanes as closed as possible. If necessary, gently pull down on the bottom vane. You may also dress the vanes gently with your hands to help them close. Then roll up the shading slowly to flatten the vanes. Allow the fabric to remain in the headrail for up to 24 hours.

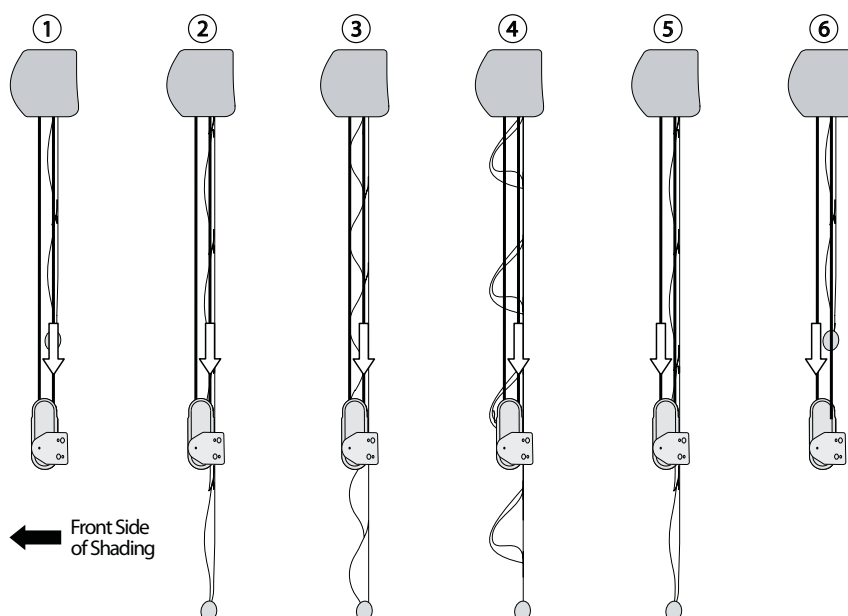

To prevent vane set, exercise the shade daily by raising and lowering it and opening and closing the vanes.

EasyRise™ Cord Loop Operation

One of the important benefits of Pirouette® Window Shadings is ease of operation. With the EasyRise™ system, a continuous cord loop, which works on the principle of a pulley, rotates a clutch to raise or lower the shading.

Referring to the illustration at right, from the fully raised position, pull down on the rear cord of the cord loop to lower the shading (1, 2). In the fully lowered position, continue to pull on the rear cord to open the vanes (3, 4). Pull on the front cord to close the vanes and raise the shading (5, 6).

Ultraglide® Wand Operation

IMPORTANT! To operate UltraGlide® on Pirouette® Window Shadings the wand is pulled straight down and out, rather than at an angle across the shading. This is to protect the vanes from being damaged by the wand.

To Lower the Shading

Pull the wand straight out from the fabric at an angle greater than 25°. The clutch will click and the fabric will proceed with a controlled descent.

To stop the shading in any position, simply pull the wand straight down.

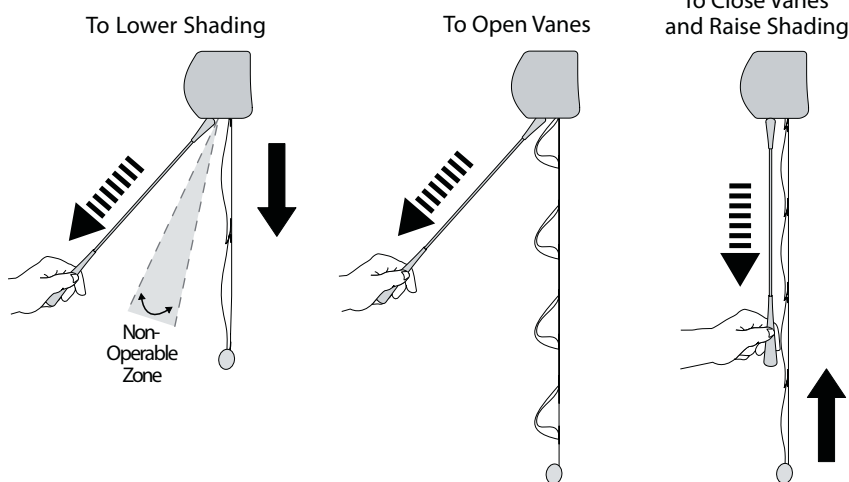

To Open the Vanes

After lowering the shading completely, continue to pull on the wand at an angle greater than 25°, until the vanes are fully open.

To Raise the Shading

Hold the wand close to the fabric and pull straight down. Pump the wand down using short strokes to gradually raise the shading.

Caution: To avoid damage to the shading or personal injury, do not release the wand until it is fully retracted. To avoid breaking the cord inside the wand, do not use long strokes (over 42") or apply excessive force on the wand while pulling it.

Softtouch® Motorised Operation

To Lower the Shading

Gently pull the wand down to move the shading in the down/closed direction. The shading will move to the fully closed position.

To Open the Vanes

With the shading fully lowered, gently pull the wand down to open the vanes.

To Close the Vanes

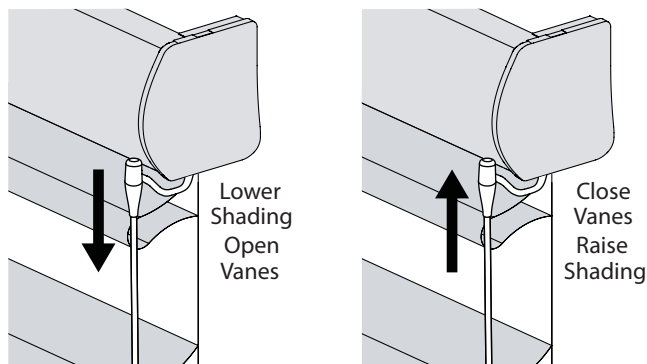

With the shading fully lowered and vanes open, gently push the wand up to close the vanes.

To Raise the Shading

With the shading fully lowered, gently push the wand up to move the shading in the up/open direction. The shading will move to the fully open position.

To Stop the Shading

While the shading is moving in the up/open direction, gently push the wand up. (A brief pull down on the wand will also stop the shading.) While the shading is moving in the down/closed direction, gently pull the wand down. (A brief push up on the wand will also stop the shading.)

Vane Alignment

- Side-by-side vane alignment is standard for shadings of the same fabric style, color, vane size, opacity, height and mounting style.
- The bottom fabric panel is adjusted to accommodate the height of the shading and allow for top to bottom vane alignment. Vane alignment should be within 1/4" from one shading to another when mounted at the same height.
- Depending on the shading height and vane size, the bottom fabric panel will vary in size up to 4" for the 4" vane and up to 5" for the 5" vane size.
- To ensure shadings are fabricated with bottom fabric panels of the same height, they must be ordered at the same time, in the same vane size, same fabric, with identical height measurements, and the same mounting style.
- For inside (IB) mounts, if the ordered lengths are within 1/4" of one another, order both shadings using the longer of the two height dimensions.

These photos illustrate consistent vane alignment and bottom panel variance.

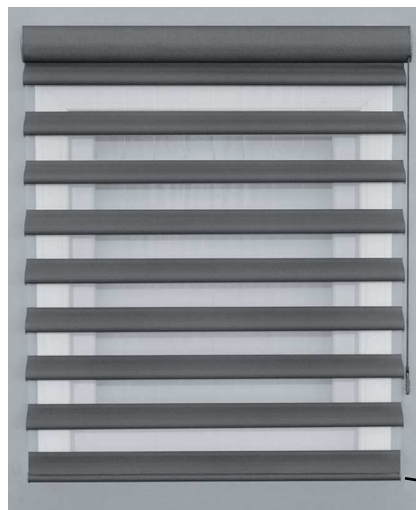

Note the variation in size of the bottom fabric panel.

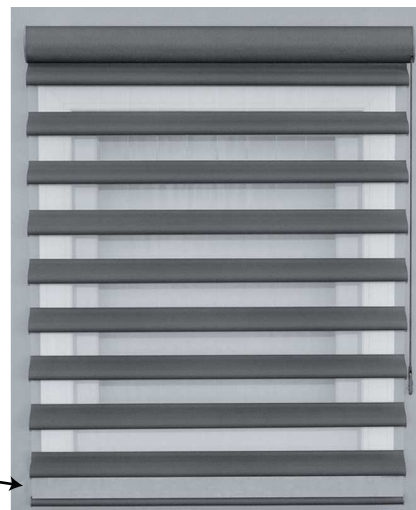

Zero Bottom Fabric Panel Option

- Available for outside recess mount only.
- Eliminates the flat fabric panel at the bottom of the shading.
- Becomes an operable bottom vane.
- Lengthens shading up to 5"; the final length of the shading is dependent on the amount of fabric necessary to make the last vane operable.
- Submit height dimensions as you normally would and the factory will adjust the height accordingly.
- Exact drop of shading cannot be predicted at time of order.
- No surcharge applies for zero bottom fabric panel.

BEFORE:
Outside Mount with
Flat Fabric Panel

AFTER:
Outside Mount with
Zero Bottom Fabric Panel

The flat panel of fabric becomes a longer, operable vane.
