Kingsway Shutters - not available in shapes

How to calculate square metres

Inside or outside recess fitting

For Example:

If the required measurement of the shutter is 1525mm wide x 1525mm drop multiply the width by the drop i.e.

$$1525\text{mm} \times 1525\text{mm} = 1.525\text{metres} \times 1.525\text{metres} = 2.33 \text{ square metres}^*$$

You then multiply this figure by the cost per square metre i.e. £320 (standard finish)

$$2.33\text{sqm} \times \text{£}320 = \text{£}745.60 \text{ RETAIL PRICE INC. VAT.}$$

*Square metres are calculated to 2 decimal places.

Standard finish Shutters (including all Z frame, L frame, Full Height and Cafe Style. Bright White and Antique White)	£320	per square metre
Colours (including all Z frame, L frame, Full Height and Cafe Style)	£381	per square metre
