Child Safety

SOME IMPORTANT INFORMATION

Children are curious about the world around them, so even basic household items including window coverings can turn into potential hazards for them. Making our window blinds safe for homes with infants or young children is a top priority at Luxaflex®.

We have developed a wide range of window covering products to help reduce the risk of accidents. From cordless blinds to motorized operation we are continually developing new products that are designed with safety in mind.

Luxaflex® is committed to adhering to the European EN 13120 standard (Internal Blinds Performance Requirements incl. safety) as a minimum safety requirement. Read more about the many safety features in our products at www.Luxaflex.co.uk.

General Advice

Buyers and users of blinds should be aware of the hazards that can be posed by unrestrained cords, braids, loop chains and wires, which may be hazardous to young children.

The following guidelines should always be considered.

- Young children can be strangled by loops in pull cords, chains, tapes and inner cords that operate the product. They can also wrap cords around their necks.
- To avoid strangulation and entanglement, keep cords out of reach of young children.
- Do not tie cords together
- Move beds, cots and furniture away from window covering cords
- Make sure cords do not twist and create a loop.
- Install and use safety devices according to the installation instructions on these devices to reduce the possibility an accident.

There are a number of SAFETY features across our window covering products that help to minimize the risk to children

What the Law Says

FOR BLINDS WITH CHAINS OR CORDS

RESTRICTED OPERATING LENGTH IF INSTALLATION HEIGHT IS **KNOWN**:

1. With chain/cord tensioner Minimum 1.5m from the floor.
2. With safety chain break Minimum 0.6m from the floor
3. With Pull cord(s) Minimum 1.5m from the floor

RESTRICTED OPERATING LENGTH IF INSTALLATION HEIGHT IS **UNKNOWN**:

1. With chain/cord tensioner Maximum 1m.
2. With safety chain break Maximum 2/3 of product height.
3. With Pull cord(s) Maximum 1m

MEASURING YOUR BLIND

Measure both the width and drop in three places and select the smallest one.

NB: At the time of order, please ensure that you provide the installation height. (Installation Height is the distance from the floor to the point where the brackets are to be fitted).

A = Width of Blind

B = Drop of Blind

C = Installation Height

Child Safety Solutions

Motorised Operation

Available with Roller Blinds.

Wand Control Vertical Blinds

Child Safe and practical.
